

## MAILRETRIEVER.NET

An Exchange Admin's Best Friend

*Single Message Restore for Exchange*

MailRetriever is an affordable easy-to-use software package for browsing, recovering, searching, exporting, and analyzing e-mail and mailbox content directly from Microsoft Exchange Data Stores (EDBs). With MailRetriever, you are never more than a few clicks away from recovering a message or mailbox.

- Single-message restore for Exchange
- Recover lost or corrupted emails & Public Folders in minutes
- Discover Email for HR & Regulatory Investigations
- Export mail directly from EDB to PST
- Simplify Exchange Migrations
- Available for Exchange 2003 and 2007 customers with or without Microsoft DPM
- Simplify Exchange Migrations

## RESTORE MESSAGES IN MINUTES

Quickly identify and restore e-mail back to a live server or to a .PST. Sync the live data base, with the archived EDB, in one click with the differential restore feature.

## MailRetriever

Let's face it. Users don't always know what they are asking for, they accidentally delete an email, call the IT department and expect you can magically recover it for them. Like you don't have 20 more important things to do, right? Ever wish you could pass requests like this off to someone else, say your best friend? With MailRetriever, your best friend is built in and message-level recovery is always just a few clicks away.

### Simple to Install

Installs in minutes on Windows Server 2003/2008, XP, Vista. Requires Outlook 2003/2007 to be installed.

### Compliance Features

MailRetriever discovers and recovers e-mail items required for legal or regulatory purposes in minutes.

### Open Unmounted Exchange Data Stores:

Just browse to the location of the un-mounted Exchange 2003 or Exchange 2007 EDB and open. The contents are presented in an Outlook-style interface.

### Search Data Stores for E-mail Discovery

Enter the search criteria and run detailed queries across multiple data stores, selecting any combination of mailboxes or folders you wish to search. From the results, you can view message contents including attachments in a message view.

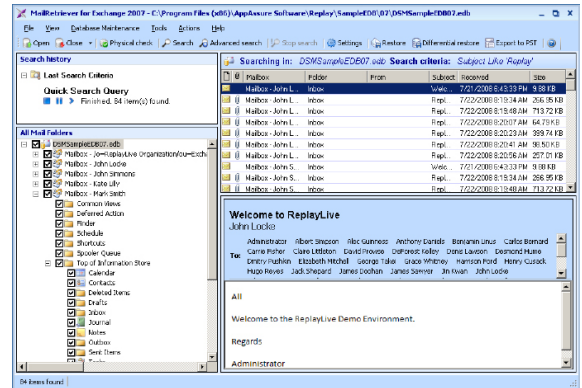

MailRetriever discovers and recovers e-mail items that have been deleted, corrupted or are required for legal or regulatory purposes.

## Lowest Pricing to Suit the Economic Climate

- MailRetriever for Exchange - \$999
- MailRetriever for DPM - \$798

## MailRetriever for Exchange

MailRetriever for Exchange is an affordable and easy-to-use software package for browsing, recovering, searching, exporting, and analyzing e-mail and mailbox content directly from any unmounted Microsoft Exchange Data Store (EDB). MailRetriever for Exchange can even open and repair corrupted EDB files. With MailRetriever for Exchange, you are just a few clicks away from recovering a message or mailbox. MailRetriever for Exchange eliminates the need for time consuming full-server and EDB restores for recovery of messages.

## MailRetriever for DPM

If you already use Microsoft DPM to protect your Exchange servers, MailRetriever for DPM is the single-best way to increase your functionality and allow message-level recovery in minutes.

## MailRetriever Lite

MailRetriever Lite for Exchange provides unlimited single message restores by allowing the user to simply search through e-mail databases to identify individual mailboxes within an Exchange data store and restore them to a live Exchange Server. MailRetriever Lite is a limited version release, however it is tightly integrated with MailRetriever for easy downloading to obtain all MailRetriever features when you need them most.
